COMMERCE AND FINANCE

COURSE DESCRIPTION

The Latin words "trade, trafficking" and "merchandise," "mercium," are the roots of the English word "commerce." Some analysts trace the history of business back to the earliest recorded transactions in prehistoric times. Prehistoric people traded what they had for commodities and services from one another, which allowed them to trade in addition to their usual self-sufficiency.

The advent of currency as a standardized form of payment aided in the expansion of the trade of goods and services throughout history. European trade flourished during the middle Ages thanks to the exchange of upscale items during trade shows.

As a subset of itself, modern commerce comprises a complex network of businesses that compete to maximize profits by providing goods and services at the lowest possible cost of production to the market, which is made up of individuals, organizations, and other businesses. These days, commerce encompasses more than just the buying and selling of products and services; it also includes the online interchange of data, information, views, opinions, intellectual property, and visual recognition, among other things.
